# Australia’s Top 20 CO₂ Performers August 2016

Listed below are Australia’s top 20 performing new light vehicles at the end of August 2016. Rankings are based on the combined cycle tailpipe CO₂ emissions for the best performing variant of each model.

<table>

</tbody>
</table>

Note: The top 20 models listed above are based on the best performing variant of the listed model. Variants with different engines, transmissions and fuel types may have different CO₂ emissions. Where results are equal, rankings may be determined by urban or extra urban tailpipe CO₂ emissions or energy consumption. Electric and plug-in hybrid vehicles produce the least tailpipe CO₂ emissions.
